SUMMARY:

A passionate Front end engineer with an experience in Fullstack engineering.

TECHNICAL SKILLS:

- **Frontend** - Javascript, React Js, Next Js, TypeScript
- **Backend** - Node Js, Spring Boot, Java
- **Database** : MY SQL, Postgres, MongoDB, Supabase, Prisma

EXPERIENCE:

Software Engineer - HSBC Technologies | August 2023 - Present

- Contributed to the development of microservices architecture using Spring Boot framework, gaining practical experience in software engineering principles and best practices.
- Implemented a Search feature in the UI using React Js to fetch data based on certain criteria.
- Supported containerization efforts using Docker and aided in the deployment orchestration with Kubernetes, acquiring foundational knowledge in modern DevOps practices.

PROJECTS:

1. **Spotify clone:** FullStack Application where users can login, signup, upload, listen and like songs [\[LINK\]](#)

Tech Stack : Next Js, Supabase, TypeScript, Tailwind, Supabase auth

- Front end development using Next Js 14 (App router), responsive UI
- Backend development using supabase APIs
- Database management using Supabase SQL (for text) and bucket (for songs) storage
- Authentication implemented using Supabase APIs

2. **Twitter Clone:** FullStack Application where users can login, signup, create posts (text/image), like post, comment post, follow, unfollow users. [\[Link\]](#)

Tech Stack : Next Js, MongoDB, TypeScript, Tailwind, Prisma, Auth JS

- Front end development using Next Js 14 (App router), responsive UI
- Backend development using Next Js routes and action servers
- Database management using MongoDB for text and Uploadthing for images
- Authentication implemented using Auth Js

EDUCATION:

MIT World Peace University Pune | BTech in Computer Science | July 2019 - June 2023 | 9.32 CGPA
